

Project Design Phase

Problem – Solution Fit Template

Date	7 September 2026
Team ID	Individual
Project Name	An employee requests installation of licensed software through the Service Catalog
Maximum Marks	2 Marks

Problem – Solution Fit: The proposed ServiceNow solution addresses the employee's software installation problem by providing a standardized Service Catalog request and an automated approval and fulfillment process.

Define CS, fit into CC Focus on J&P, fit into BE, understand RC	1. CUSTOMER SEGMENT(S) CS - Employees / End Users (request software installation) - Managers (approve requests) - IT / Software Support Team (fulfill and install software) - IT Administrators (manage catalog, workflows, and configurations) - Organizations using ServiceNow for IT Service Management	6. CUSTOMER CONSTRAINTS CC - Limited access to install licensed software on their own - Dependency on IT team for software installation - Approval required from managers or authorized personnel - Limited visibility into request status - Compliance and license restrictions - Budget and licensing limitations - Need to follow organizational IT policies and security guidelines	5. AVAILABLE SOLUTION(S) AS - Manual installation requests via email or phone - Ad-hoc requests to IT support team - Shared software licenses (informal) - Third-party IT ticketing tools - Self-installation (not allowed in most organizations) - Paper-based request forms	Explore AS, differentiate Focus on J&P, fit into BE, understand RC
	2. JOBS-TO-BE-DONE / PROBLEMS J&P - Request installation of required software for work - Get approval for the software request - Ensure the request is processed and assigned to IT - Track the status of the request - Get the software installed in a timely manner - Handle cases where software license is unavailable - Maintain compliance with organizational policies	9. PROBLEM ROOT CAUSE RC - No centralized and structured process for software requests - Lack of automation in approval and fulfillment - Unclear ownership and assignment of requests - Manual communication leading to delays - Limited visibility into request tracking - Risk of unauthorized software installation - Inconsistent data handling and no single source of truth	7. BEHAVIOUR BE - Employees search for ways to get software quickly - Send emails or make direct requests to IT - Follow up multiple times for status updates - Managers delay approvals due to lack of visibility - IT team manually tracks and assigns tasks - Users get frustrated due to delays - Employees may try to install software without authorization	
Identify strong TR & EM	3. TRIGGERS TR - Need to use a new software for a project or role - Onboarding of new employees - Requirement for updated version of existing software - Completion of a project requiring specific tools - Expiry or unavailability of existing software license - Announcement of new business requirements	10. YOUR SOLUTION SL - A ServiceNow-based Software Installation Request solution using Service Catalog - User-friendly catalog item with required variables - Automated workflow for approvals and task creation - Business rules for auto-assignment and notifications - End-to-end tracking from request to fulfillment - Integration with ServiceNow tables (sc_request, sc_req_item, sc_task) - Handles exceptions (e.g., license unavailable) by creating an incident - Centralized, secure, and compliant process	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE - ServiceNow Service Portal - Employee Self-Service Portal - Email notifications - ServiceNow platform (web browser)	Extract online & offline CCH BE
	4. EMOTIONS: BEFORE / AFTER EM - Before: Frustrated, confused, anxious, uncertain, time-consuming, lack of visibility - After: Satisfied, confident, in control, saves time, transparent process, improved productivity		8.2 OFFLINE - End-user training and documentation - IT support communication - Organization announcements - Help guides / tooltips within the portal	

Problem – Solution Fit

The problem is addressed by replacing manual coordination with a standardized Service Catalog request and automated ServiceNow workflow. The solution captures the required software information, routes the request for approval, creates a fulfillment task for the Software Support Team after approval, and supports request status tracking and notifications.
