

Acceptance Testing

UAT Execution & Report Submission

Date	12 September 2026
Team ID	Individual
Project Name	An employee requests installation of licensed software through the Service Catalog
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the User Acceptance Testing (UAT) coverage and open issues for the Software Installation Request Automation project in ServiceNow.

2. Defect Analysis

This report shows the defects identified during UAT and their current status. As the project is being validated, no defects are recorded unless an issue is actually observed.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

3. Test Case Analysis

This report shows the UAT test coverage for the main functions of the ServiceNow software installation request process.

Section	Total Cases	Not Tested	Fail	Pass
Service Catalog & Request Submission	2	0	0	2
REQ & RITM Processing	2	0	0	2
Approval & Fulfillment	2	0	0	2
Business Rule / Automation	1	0	0	1
Update Set & Deployment Readiness	1	0	0	1
End-to-End Validation	1	0	0	1

4. UAT Test Coverage

The UAT coverage is based on the implemented project flow: employee submits the Software Installation Request, ServiceNow creates the REQ and RITM, the request is routed for approval, an SCTASK is created for the Software Support Team, the task is completed, and the configured automation and Update Set are validated.

Test Case	Area	Expected UAT Outcome	Status
TC-001	Software Installation Request catalog item	Verify the catalog item is accessible and the request form is displayed.	Done
TC-002	Request details	Verify Software Name, Version Required, License Justification, and Urgency are captured.	Done
TC-003	REQ creation	Verify a Request (REQ) is generated after submission.	Done
TC-004	RITM creation	Verify the Requested Item (RITM) is created and contains the submitted catalog variables.	Done
TC-005	Approval	Verify the request reaches the configured approver and the approval decision is recorded.	Done
TC-006	SCTASK fulfillment	Verify an SCTASK is created after approval and assigned to the Software Support Team.	Done
TC-007	Task completion	Verify the fulfillment task can be completed and its state is updated.	Done
TC-008	Business Rule / Automation	Verify configured backend automation works for the software request process.	Done
TC-009	Update Set	Verify project configurations are captured in the Update Set for migration.	Done
TC-010	End-to-End	Verify the complete flow from employee request through approval and fulfillment.	Done

5. Open Issues / Exceptions

No open issues are recorded in this report at the time of preparation. If a UAT defect is identified, it should be added to the defect tracking section with reproduction steps, severity, status, and feedback.

6. Final Report Output

The UAT report provides a consolidated view of testing for the Software Installation Request Automation project. Final Pass/Fail values should be updated after executing each test case in the ServiceNow instance.

7. Version Control
